

SoLuna – Mockup

What Changed?

Screen or element	The wireframe assumed	The mockup shows	What I will change
Login / Create Account	Just basic input boxes and one button	The final screen needs a title, labels, helper text, and more	Add clearer labels and space the form elements properly
Home / Main screen	One screen could show the main photo/card plus all folders or	The main screen looks crowded when too many things are placed	Limit the main screen to the most important content and move
Files / Memories screen	All files could fit in one simple layout	Different photos and memories need more room to be seen	Use separate cards or a cleaner gallery layout instead of
Scrapbook Preview	A simple image with one button was enough	The scrapbook works better when it focuses on one memory/date at	Make the preview more visual and reduce unnecessary buttons
Settings / Status	All account options could fit in a basic list	Some options need clearer grouping, like status and	Group related settings together and keep only the important
Navigation	The wireframe mainly used arrows or direct screen-to-screen	The mockup needs users to switch between several main	Add a bottom navigation bar for faster access to Home, Dates,
